

Contract position: Senior NodeJS Developers

PBSA is hiring Proactive individuals with ability to work from anywhere with minimal supervision.

This is a contract position and not a full-time role. PBSA offers competitive rates for contract roles. The length of the contract will be for a minimum of 1 month and a maximum of 6 months.

We are interested in individuals with:

- Good grasp of Javascript, NodeJS
- Prior experience development large B2C applications using Node stack
- If you are excited about data intensive, API driven applications & passionate about consumer facing applications then we have some challenging tasks in the Node stack

Technical Requirements

- NodeJS, ExpressJS, PostgreSQL, Sequelize, git / svn and similar UNIX based development environment. (5+ years of total experience & minimum 2 years of experience with NodeJS)
- Blockchain and dApp development skills are an added plus
- Experience working with data intensive GUI applications is an added plus
- Electron based application development experience is desirable
- git and hands on experience with version control is mandatory
- Familiarity with project management tools & community driven development - Github, Gitlab, Phabricator etc or participation in FOSS projects / community initiatives
- A github profile with actively maintained projects or active participation in projects
- Share Published NPM packages if any
- Hands on experience with a UNIX flavour for development or day to work is mandatory.
- Attaching a cover letter clearly indicating why you think you will be a good fit will help us understand more about you.

Soft-skills & tools

- We are a flexible organization with some of our staff members working remotely. Thus proactive, asynchronous, yet communication using tools like Slack, Jira, Github etc is mandatory.
 - We have daily standup meetings & everyone huddles discussing their work - you are expected too.
-

About Peerplays Blockchain Standards Association (PBSA)

We are working on bringing provably fair to the gaming industry & Payment methods for gamers. Our underlying Peerplays blockchain facilitates fast, transparent payment and transactions. We are in the active development of adding new features to the core blockchain and multiple dApps. We have unique office space at a nuclear bunker & talented developers led by a charismatic leadership. If you are interested in a fast paced environment with opportunity to learn new skills and apply them, we have wonderful opportunities. Both our blockchain team and dApps team has multiple openings.

Selection Process

Once your profile is shortlisted, we will give you a practical assessment test — A coding assignment with a timeline. Most the coding assignments can be done on an Ubuntu LTS version of macOS. The practical tests are mandatory for everyone from entry level to senior levels as we expect our team members to be hands on in their respective field.
